

IRIS

This potholder has been tested in accordance with EN 420: 2003 + A1:2009, ISO 12127-1:2015 and conforms to PPE Regulation (EU) 2016/425.

Designation

Potholder for private use, Risk category II as per Regulation (EU) 2016/425

Use

The potholder is designed to be used for protection against thermal risks (contact heat) associated with removing hot items off the hobs of the types usually used in domestic environment.

The potholder is intended to be used in dry condition.

Potholder should be inspected prior to each use and damaged potholders should be replaced.

Size
One size.

Relevant applicable European standards

This potholder is designed to offer protection against contact heat, at performance level 1, and complies with relevant requirements in EN 420 and EN 407.

Performance levels

Contact heat: performance level 1 (threshold time minimum 15 s when exposed to a temperature of 100°C). The potholder is not specifically designed to offer protection for burning behaviour, convective heat, and radiant heat, small splashes of molten metal and large quantities of molten metal.

Limitations

This potholder is designed to offer palm protection only.

Only suitable for taking hot items off the hob.

Keep away from naked flame and fire.

Number of cleaning cycles

The acceptable number of cleaning cycled following the provided care instructions: 5.

The stated acceptable number of cleaning cycles is not the only factor related to the lifetime of the product. The lifetime also depends on usage, care, storage, etc.
